

Name	Developing Climate Change Capacity at the Municipal Level in Nova Scotia (2012)
Description	This booklet describes a suite of projects Service Nova Scotia and Municipal Relations (SNSMR) undertook under Atlantic Canada Adaptation Solutions (ACAS) to enhance the capacity of Nova Scotia municipalities to develop Municipal Climate Change Action Plans (MCCAPs). The first project involved development of a Municipal Climate Change Action Plan Guidebook (see separate database listing) that offers step-by-step guidance on development of MCCAPs. The second, a Municipal Mentor Project, engaged three mentors to assist municipalities through initial steps in developing their MCCAPs. The third generated the MCCAP Assistant, a document that complements the MCCAP Guidebook. The final project was a Municipal Participation ACAS Conference.
