

Name	Canadian Communities' Guidebook for Adaptation to Climate Change (2008)
Description	Building on the experience Environment Canada's Adaptation and Impacts Research Division (AIRD) has had working with decision-makers on climate and sustainability projects, this guide provides a process linked to on-going planning cycles to help planners, decision-makers, local practitioners and investors reduce climate change impacts and decrease greenhouse gas emissions while advancing sustainable development.
Type	- PRODUCTS: Plans, Assessments, Studies - PRODUCTS: Training and Capacity Building
Sector	- Infrastructure - Cross Disciplinary
Focus Area	
Region
