

Name	Conserving Virginia's Fish and Wildlife for the Future: Preparing for a Changing Climate
Description	This strategy was developed to provide initial guidance on actions Virginia's conservation community can implement immediately to enhance the conservation of wildlife and habitats in the face of climate change while more comprehensive adaptation strategies are developed. This effort to identify initial climate change adaptation strategies was initiated by the Virginia Department of Game and Inland Fisheries (DGIF), the National Wildlife Federation (NWF), and the Virginia Conservation Network (VCN). This document is a compendium to Virginia's Wildlife Action Plan, an existing document created to focus conservation efforts on preventing species from becoming endangered. Strategies included in the document relate to coastal habitats.
Type	- PRODUCTS: Plans, Assessments, Studies - PRODUCTS: Other
Sector	- Natural Ecosystems - Biota
Focus Area	- Conservation/ Restoration of Sensitive Species and Habitats
Region	- Regional Or State -- Mid-Atlantic
Lead Agencies	Virginia Department of Game and Inland Fisheries, National Wildlife Federation, and Virginia Conservation Network
