Name	Anticipatory Planning for Sea-Level Rise Along the Coast of Maine
Description	Anticipatory Planning for Sea-Level Rise Along the Coast of Maine constitutes Maine's first systematic assessment of its vulnerability to a change in shoreline position as a result of accelerated sea-level rise associated with global climate change. The report was prepared as a State-University cooperative project by the Marine Law Institute of the University of Maine School of Law, the Maine Geological Survey, and the Maine State Planning Office (EPA funded report).
