

Name	Confronting Climate Change in the U.S. Northeast: Science, Impacts, and Solutions
Description	From the report: The Northeast Climate Impacts Assessment (NECIA) is a collaborative effort between the Union of Concerned Scientists (UCS) and a team of independent experts to develop and communicate a new assessment of climate change and associated impacts on key climate-sensitive sectors in the northeastern United States. The goal of the assessment is to combine state-of-the-art analyses with effective outreach to provide opinion leaders, policy makers, and the public with the best available science upon which to base informed choices about climate-change mitigation and adaptation. Note: The report includes a chapter on marine impacts and a chapter on coastal impacts.
Type	- PRODUCTS: Plans, Assessments, Studies
Sector	<ul style="list-style-type: none"> - Public Health and Safety - Infrastructure - Managed Ecosystems - Natural Ecosystems - Biota - Social and Cultural Resources - Economic Resources - Recreation and Tourism
Focus Area	<ul style="list-style-type: none"> - Sustainability of Marine Ecosystems - Coasts and Climate Resilience (including sea-level rise) - Climate Impacts on Water Resources - Changes in Extremes of Weather and Climate - Conservation/ Restoration of Sensitive Species and Habitats
Region	- Regional Or State -- New England -- Mid-Atlantic
