

Name	Confronting Climate Change in the U.S. Northeast: Science, Impacts, and Solutions
Description	From the report: The Northeast Climate Impacts Assessment (NECIA) is a collaborative effort between the Union of Concerned Scientists (UCS) and a team of independent experts to develop and communicate a new assessment of climate change and associated impacts on key climate-sensitive sectors in the northeastern United States. The goal of the assessment is to combine state-of-the-art analyses with effective outreach to provide opinion leaders, policy makers, and the public with the best available science upon which to base informed choices about climate-change mitigation and adaptation. Note: The report includes a chapter on marine impacts and a chapter on coastal impacts.
Type	- PRODUCTS: Plans, Assessments, Studies
Sector	<ul style="list-style-type: none"> <li>- Public Health and Safety</li> <li>- Infrastructure</li> <li>- Managed Ecosystems</li> <li>- Natural Ecosystems</li> <li>- Biota</li> <li>- Social and Cultural Resources</li> <li>- Economic Resources</li> <li>- Recreation and Tourism</li> </ul>
Focus Area	<ul style="list-style-type: none"> <li>- Sustainability of Marine Ecosystems</li> <li>- Coasts and Climate Resilience (including sea-level rise)</li> <li>- Climate Impacts on Water Resources</li> <li>- Changes in Extremes of Weather and Climate</li> <li>- Conservation/ Restoration of Sensitive Species and Habitats</li> </ul>
Region	- Regional Or State -- New England -- Mid-Atlantic
