

Name	An Adaptation Portfolio for the United States Coastal and Marine Environment
Description	This paper describes a portfolio of adaptation policies. Adaptation policies are defined as "the actions taken to enhance the resilience of human and natural systems to the effects of climate change and variability for marine and coastal environments within the United States and its territories." For each policy, the paper includes questions related to the applicability of the policy to specific locations and scales, timing, and other questions related to implementing policies. The paper also includes information on climate impacts to coasts and marine ecosystems.
Type	- PRODUCTS: Plans, Assessments, Studies
Sector	- Managed Ecosystems - Natural Ecosystems - Biota
Focus Area	- Coasts and Climate Resilience (including sea-level rise) - Conservation/ Restoration of Sensitive Species and Habitats
Region	- National
Lead Agencies	Resources for the Future
