

NExUS Needs Assessments Sat Nov 17 04:22:00 EST 2018

Need	Daily, watershed-level estimates of freshwater input into coastal oceans
Description	Daily, watershed-level estimates of freshwater input (with USGS streamflow measurements?) into coastal ocean to quantify estimates of salt-wedge location in major rivers and estuaries.
Type	- DATA: In situ Observations - DATA: Observing Systems
Focus Area	- Coasts and Climate Resilience (including sea-level rise) - Climate Impacts on Water Resources
Discipline	- Physical Science
Sector	- Natural Ecosystems
Region	- Regional Or State -- New England
Source	Northeast Regional Association of Coastal and Ocean Observing Systems (NERACOOS)
