| Description | Environment Canada is a national focal point for Canadian research on the climate system and the science of climate change. Its scientists investigate Canada's past, present and future climate to determine how our climate is changing, as well as the causes and effects of this change. |
| Types       | - Federal                                                                                                                                                                                                                                                                                    |
