| Name | Department Fisheries and Oceans Climate Change Science Initiative |
| Web | http://www.dfo-mpo.gc.ca/science/oceanography-oceanographie/ccsi-irsc-cc-eng.html |
| Description | The Department of Fisheries and Oceans' Climate Change Science Initiative (CCSI) recognizes the importance of: improving our predictions of climate change in Canada's three oceans and its inland water sheds; understanding potential impacts of climate variability on aquatic ecosystems; anticipating some of the emerging issues that have not been adequately investigated; and identifying potential socio-economic effects. |
