Name	Engineers Canada
Web	http://www.engineerscanada.ca/climate-change
Description	Engineers Canada has undertaken work to develop an infrastructure climate risk procedure known as the PIEVC Engineering Protocol. This work was co-sponsored by Natural Resources Canada. The Protocol is a tool for engineers and other professionals to assess infrastructure vulnerability to current and future climate.
Types	- Non-governmental Organization (NGO)
Contacts	David Lapp, FEC, P.Eng., Manager, Professional Practice
