<b>Name</b>	<b>ACASA Expert Panel on Climate Change Adaptation</b>
Description	In December 2013, Atlantic Climate Adaptation Solutions Association (ACASA) created an Expert Panel on Climate Change Adaptation, made up of leading researchers in the physical and social sciences, to promote awareness, understanding, and integration of climate change adaptation research. The Panel will provide guidance to provincial and local governments in regards to adaptation strategies to address the impacts of climate change in communities and ecosystems. It offers peer-review of papers, reports and activities, and produces an annual communiqué to governments and the general public on the state of climate change adaptation science and policy.
Sector	- Cross Disciplinary
Status	- Ongoing
