<b>Name</b>	<b>Collaborative Development of Climate Information for the Connecticut River Basin using Shared Vision Forecasting</b>
<b>Description</b>	The spread of technical information and practices is often lost in communication when transferred between a source and the end users. This research seeks to use Shared Vision Forecasting and the diffusion of innovations framework to promote the adoption of forecasting techniques. Through a series of workshops with water managers in the Connecticut River Basin, this research will establish a climate knowledge network and an information baseline of the current use of climate information and forecasting in water management decision-making. Better understanding of how managers adopt new forecast techniques and climate data will provide the feedback needed to improve forecasting and climate information.
<b>Category</b>	- Research
<b>Sector</b>	- Infrastructure
<b>Focus Area</b>	- Climate Impacts on Water Resources
<b>Region</b>	- Regional Or State -- New England
<b>Status</b>	- Ongoing
<b>Timelines</b>	Date of Completion, December 2012
<b>Lead Agencies</b>	NOAA Regional Integrated Sciences and Assessments
<b>Contacts</b>	Casey Brown, University of Massachusetts Amherst, cbrown@ecs.umass.edu
