

NExUS Ongoing Projects and Activities Mon Feb 18 13:32:36 EST 2019

Name	Water Sustainability and the Environment under a Changing Climate: Promoting Adaptive Management in the Delaware River Basin
Description	The Delaware water release policies are constrained by the dictates of two US Supreme Court Decrees (1931 and 1954) and the need for unanimity among four states: New York, New Jersey, Pennsylvania, and Delaware -- and New York City. Coordination of their activities and the operation under the existing decrees is provided by the Delaware River Basin Commission (DRBC). While much progress on improving the release rules has been made since 2006, we have identified a number of unresolved issues which deserve analytic attention, and for which we are confident that quantitatively based recommendations can be generated and offered for consideration to the stakeholders by the Delaware River Basin Commission.
Sector	- Infrastructure - Managed Ecosystems - Economic Resources
Focus Area	- Climate Impacts on Water Resources
Region	- Regional Or State -- Mid-Atlantic
Status	- Ongoing
Timelines	Completion 2015
Lead Agencies	NOAA Regional Integrated Sciences & Assessments (RISA) Consortium for Climate Risk in the Urban Northeast (CCRUN)
Contacts	Upmanu Lall, Director, Columbia Water Center, Columbia University, ula2@columbia.edu
