|---------------|--|
| Name | Lower Cape Fear Watershed Study |
| Description | Using the Lower Cape Fear watershed and its subwatersheds as a study area, this project aims to assess water availability and use over time, under different scenarios, at several temporal and spatial scales. This project will involve documenting past, current, and potential future patterns of water availability (i.e., supply) and past, current, and potential future patterns of demand, by land use and by sector and will incorporate various climate change scenarios. |
| Category | - Climate-change Specific Projects - Research |
| Sector | - Infrastructure - Natural Ecosystems |
| Focus Area | - Climate Impacts on Water Resources |
| Region | - Regional Or State -- South East |
| Status | - Ongoing |
| Lead Agencies | NOAA Carolinas Integrated Sciences and Assessments (CISA) |
| Contacts | Burrell Montz, East Carolina University, montzb@ecu.edu |
