

NExUS Ongoing Projects and Activities Tue Nov 20 00:41:03 EST 2018

Name	Lower Cape Fear Watershed Study
Description	Using the Lower Cape Fear watershed and its subwatersheds as a study area, this project aims to assess water availability and use over time, under different scenarios, at several temporal and spatial scales. This project will involve documenting past, current, and potential future patterns of water availability (i.e., supply) and past, current, and potential future patterns of demand, by land use and by sector and will incorporate various climate change scenarios.
Category	- Climate-change Specific Projects - Research
Sector	- Infrastructure - Natural Ecosystems
Focus Area	- Climate Impacts on Water Resources
Region	- Regional Or State -- South East
Status	- Ongoing
Lead Agencies	NOAA Carolinas Integrated Sciences and Assessments (CISA)
Contacts	Burrell Montz, East Carolina University, montzb@ecu.edu
